ABOUT POWER BI ANALYTICS

Bring your business data to life with Power BI

Power BI is a suite of business analytics tools that deliver insights throughout your organization. Connect to hundreds of data sources, simplify data prep, and drive ad hoc analysis.

Connect with your data

Explore your data wherever it is - produce beautiful reports, then publish them for your organization to consume on the web and across mobile devices.

Everyone can create personalized dashboards with a unique, 360-degree view of their business. And scale across the enterprise, with governance and security built-in.

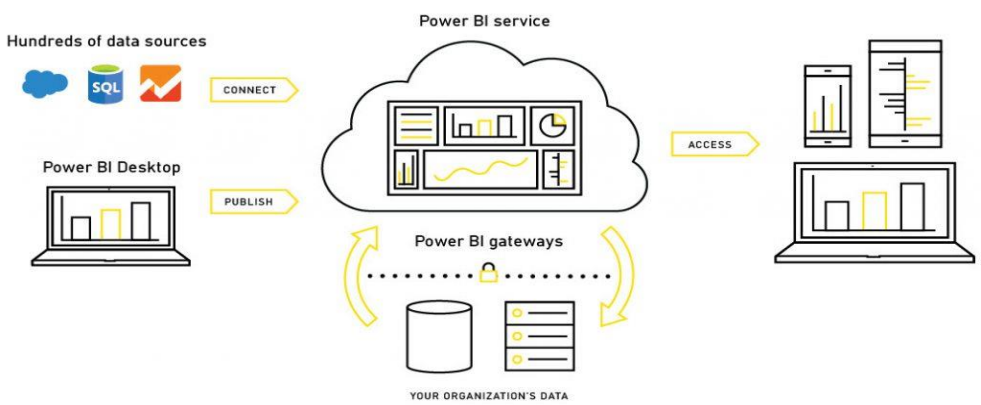
Main benefits you get by using Power BI in your business:

- **A full suite of BI tools for data visualization and reporting - access and unify data across sources.**
- **Transform company data into rich visuals - create live, real-time data metric dashboards.**
- **Easily share reports among colleagues and users via the Power BI Online Service.**

With Power BI you'll get the full picture in one pane: **It gathers all your business information in one central location that you can access whenever and wherever you want. The built-in connectors enables you to quickly import data from solutions such as Salesforce, Google Analytics, and many more.**

ABOUT POWER BI ANALYTICS

Power BI Features (Connections)



Connect to your data, any data

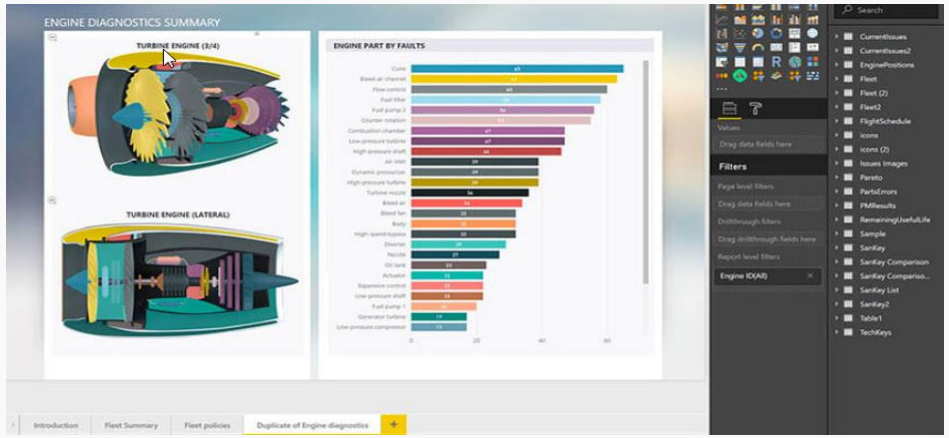
Explore your data wherever it is—in the cloud or on-premises—including big data sources such as Hadoop and Spark. With connections to hundreds of sources and constantly growing, Power BI Desktop lets you draw deep insights for a broad range of scenarios.

Provide advanced analytics with the familiarity of Excel

Clean, transform, and mash up data from multiple sources—in a few clicks. Enable business users to dig deeper into data and find patterns they may have otherwise missed, with Power BI features like quick measures, grouping, forecasting, and clustering. If you're familiar with Excel, you'll feel at home in Power BI.

ABOUT POWER BI ANALYTICS

Power BI Features (Report Creation)

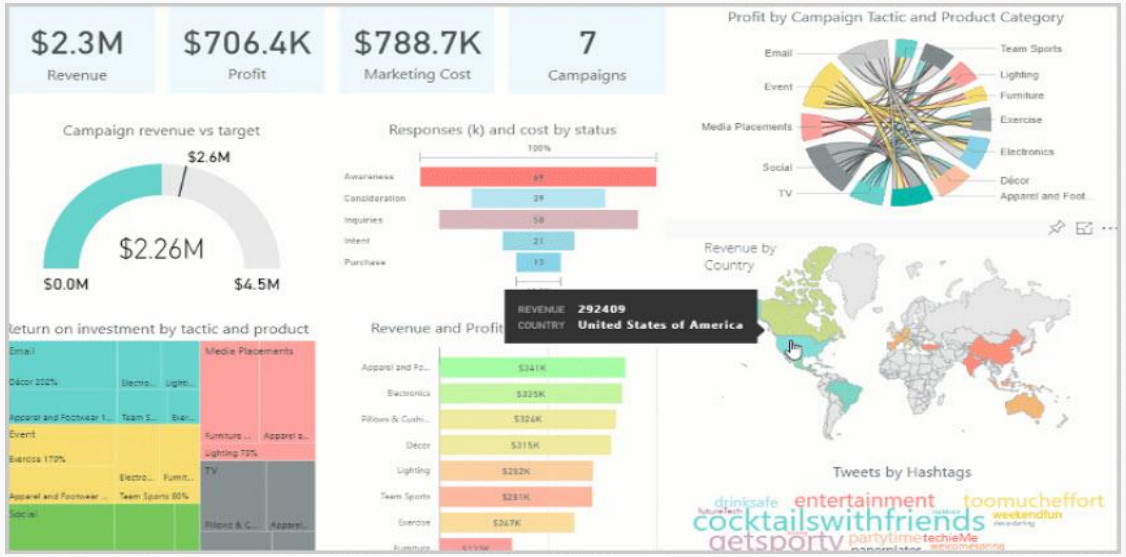


Create interactive reports customized for your business

You can create stunning reports with interactive data visualizations. Tell your data story using a drag-and-drop canvas and more than 85 modern data visuals from Microsoft and partners—or create your own using the Power BI open source custom visuals framework. Design your report using theming, formatting, and layout tools.

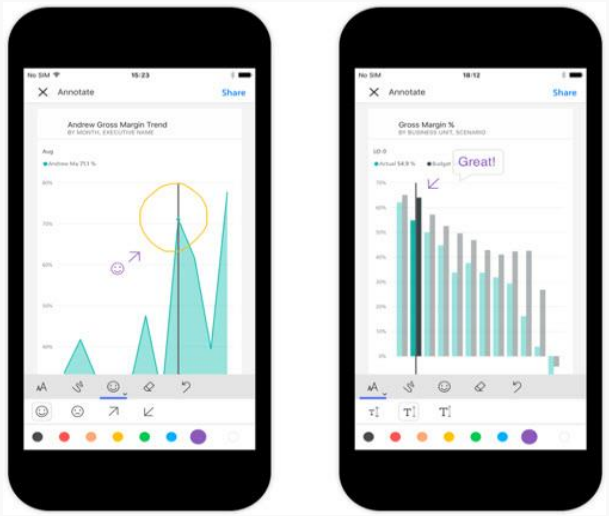
Author for everyone, anywhere

Get visual analytics to the people who need it. Create mobile-optimized reports for viewers to consume on the go. Publish from Power BI Desktop to the cloud or on-premises. Embed reports created in Power BI Desktop into existing apps or websites.



ABOUT POWER BI ANALYTICS

Power BI Features (Mobility)

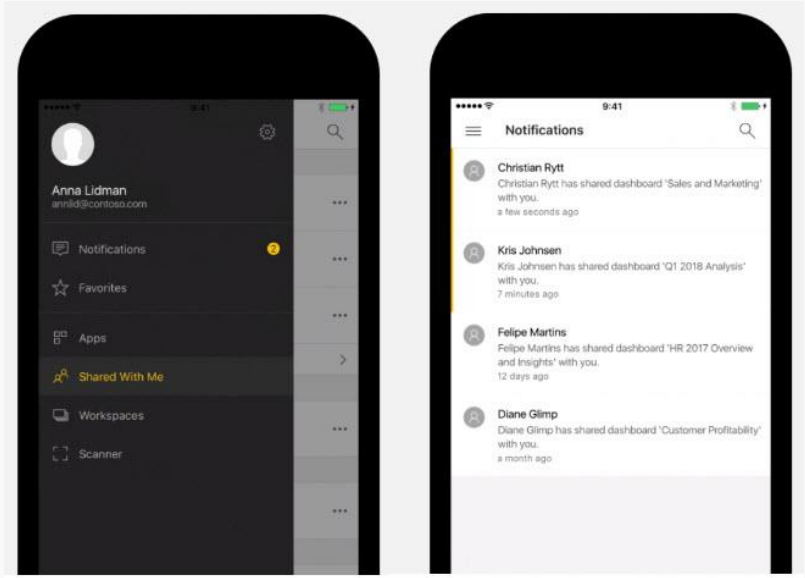


Any data, anywhere, any time

Keep on top of your data no matter where you are. With touch-enabled native apps for Windows, iOS, and Android, you can access all your data wherever you go. Monitor the health of your business using a live dashboard, create rich interactive reports and access your data on the go with native Power BI Mobile apps.

Flexible and secure mobile access

Get push notifications for personal data alerts to your device, and use 3D touch on iOS to quickly access shortcuts directly from your home screen. See your data update in real time on phones, tablets, and Apple Watch. Keep your company's data secure with Microsoft Intune mobile device and application management capabilities.



ABOUT POWER BI ANALYTICS

Why should you choose Power BI?

Traditional BI tools, such as Tableau, Qlik, etc., are solutions for analysts that provide rearview mirror intelligence on what has happened. In contrast, Power BI is business analytics service that can empower everyone—not just data specialists—with real- time insight to what is happening.

*With **Power BI**, it takes five minutes to start creating personalized dashboards and to find answers to the most important questions for your business.*

With **Power BI**, you get nonstop innovation to help you visualize and analyze data with greater speed, efficiency, and understanding. You can also reduce your IT investment in your extract-transform-load infrastructure through built-in connectivity to a variety of data sources, both in the cloud and on-premises.

Power BI lets you access real-time information to identify trends early, that way, you can head off potential issues and improve performance sooner rather than later. With advanced analytics integration you can use your data to predict outcomes for your business. Predictive intelligence help you stay on the right path to achieve your goals.

Top 5 reasons for using the Power BI Analytics solution in your business:

- **Spot trends in real time and make informed decisions**
- **Experience your business data in new ways**
- **Connect and combine data from multiple data sources**
- **Share dashboards and reports with whoever you want**
- **Cost-efficient license pricing and low TCO**

Power BI gives you a 360-degree view of your business!

ABOUT POWER BI ANALYTICS

Questions about Power BI

1 Which other cost do I have to consider for the implementation of Power BI?

The basic installation of the system is included in the service cost. Other implementation costs such as configuration, employee training, data migration, detailed adaptation, development will vary depending on the size of the implementation and the usage of the system. **Get in touch with us for a detailed quotation**.

2 Can Power BI be connected to other third-party systems and solutions?

Yes, in our **live demo section** you can test such an integration between **Power BI and Odoo CRM/ERP**. Our implementation team has already made connections to well known systems such as **Sage, Amazon, EBay, WooCommerce, PayPal, QuickBooks Accounting, MailChimp**, and many more.

3 How long does it generally take to complete the implementation of Power BI?

Implementations with basic reports can take somewhere between **2 to 4 weeks**, this will vary depending on the type of business and on a "case to case" basis. Another part of the Power BI implementation is the customization – this is the part where the estimation solely depend on the modifications you want.

4 Can I access Power BI from a mobile device when I'm out the office?

Yes, you can monitor your business right from your phone or tablet. Securely access and view live Power BI dashboards and reports on any device, share live reports and dashboards directly from the app to keep your team on the same page - the **Power BI** app is available for **Windows, iPhone, and Android**.
